

Dear Hiring Team at EVERSANA,

I'm a final-year B.Tech Computer Science (AI) student with hands-on experience in building and deploying machine learning solutions using Python, scikit-learn, pandas, and Streamlit/Flask. I've completed end-to-end projects including Titanic survival prediction and a deployed house price prediction dashboard, demonstrating my skills in data preprocessing, model building, and deployment.

While I'm still growing in areas like SQL and cloud platforms, I am a fast learner and currently building projects to strengthen those areas. I'm passionate about healthcare innovation, and I'm excited by the opportunity to contribute to EVERSANA's mission of improving lives through AI-driven insights.

I would be grateful for the opportunity to learn and grow within your team and contribute meaningfully to real-world, patient-centered solutions.

Sincerely,

Mahesh Vyas
